Types of Online Courses Your Student Can Take This Summer

1. Prerequisites

Summer learning provides a great opportunity for students to get ahead on prerequisites needed for next year's AP courses or dual enrollment.

2. Core Requirements

If your student needs to recover credits OR simply wants to free up space in next year's schedule, they might benefit from taking a required core course over the summer.

3. Career Interests

Does your student have an interest in veterinary science? Computer programming? Astronomy? What about psychology or criminology? By taking an online summer course, they can learn more about one of their career interests. Explore our summer course catalog to see all 150 course options.

4. World Languages

Taking three months off during the summer can have a negative impact on student proficiency in a world language. One way for students to keep their language skills sharp during the summer is by taking online world language courses with a highly qualified instructor.
