

### Competency-Based

Micro-credentials allow educators to focus on a discrete skill related to their practice and collect the evidence to demonstrate ability in that specific skill.

### Personalized

Wherever you are in your understanding of a particular topic, micro-credentials allow you to pick up where you left off and move toward mastery and the practical application of skills.

### Job-Embedded

Micro-credentials focus on skills that are relevant to the daily practices demanded of educators.

## EVERYTHING YOU NEED TO KNOW ABOUT MICRO-CREDENTIALS

### Research-Based

Micro-credentials are designed around skills that have been thoroughly researched, allowing educators to leverage findings demonstrated to improve their daily practice.

### Shareable

Once educators earn micro-credentials, they can display their badges on Edmodo, LinkedIn, or a blog to signal their demonstrated competency.

### Self-Directed

Micro-credentials allow educators to work at their own pace, regardless of their starting point, and take next steps toward competency.
